

# Mysterious Dice

**MAGICAL EFFECT:** Defy the laws of probability! Of the six possible numbers on a game die, you guess the two your audience is thinking of.

## HOW TO PERFORM:

Have a member of the audience choose any two sides on a die, but keep them secret:

Have a member of the audience choose any two sides on a die, but keep them secret:

Now, ask him to do the following calculations and keep them secret until he has his final answer:

Multiply one of the numbers by 5:

Add 7 to that product:

Double that sum:

Add the other number chosen from die:

Ask him to tell you his final answer:

Now reveal his original secret numbers:

## SECRET:

Subtract 14 from his final result:

## EXAMPLE

**3 & 2**

**3 & 2**

$$3 \times 5 = 15$$

$$15 + 7 = 22$$

$$22 \times 2 = 44$$

$$44 + 2 = 46$$

**46**

**3 & 2**

$$46 - 14 = 32$$

or: **3 & 2**
